)

BSD Library Functions Manual

STRCHR(3)

NAME

strchr, strrchr -- locate character in string

LIBRARY

Standard C Library (libc, -lc)

SYNOPSIS

```
#include <string.h>
```

```
char *  
strchr(const char *s, int c);
```

```
char *  
strrchr(const char *s, int c);
```

DESCRIPTION

The strchr() function locates the first occurrence of c (converted to a char) in the string pointed to by s. The terminating null character is considered to be part of the string; therefore if c is `'\0'`, the functions locate the terminating `'\0'`.
